

## Count me in!

Successful integration is characterised by equal participation and the guarantee of equal opportunities for all young people who come to Germany and wish to live here permanently. The process of integration is thereby shaped by the responsible cooperation of the people involved in this context.

The integration process includes firstly the willingness of the young migrants to deal with Germany's social and corporate system and its political and cultural basic principles, and to support the core values. Secondly the state commits itself to services that promote integration.

Along with advice and monitoring by the Youth Migration Services the Federal government provides a range of services that is free of charge to support young people. Without the young people themselves assuming their own initiative towards social and professional integration, and an active and trusting collaboration, the best possible inclusion cannot succeed even in terms of an equal participation.

For this reason I will make an active contribution to my integration and shape this process together with the professionals of the Youth Migration Services.
